

Ultra Drain Seals®

Stop Spills From Going Down The Drain

- Reinforcing mesh is “sandwiched” between layers of polyurethane — increases durability and resistance to tearing.
- Unique, urethane construction allows the pad to deform and seal off most drains — temporarily “seals” to any smooth surface.
- A valuable addition to any emergency response plan, spill kit, SPCC or stormwater management program.
- Unlike some alternative products, BOTH sides will quickly seal drains — there is no specified “top” or “bottom.”

Optional Ultra-Drain Seal Wall Mount Units allow quick response to any spill — just “grab and go”!
